### DETAILED ACTION

Applicants' arguments, filed June 6, 2008, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

#### *Rejoinder*

Claims 1-13 and 21 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 14, 15, 18-20 and 22, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on December 27, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 is drawn to a composition having its pH adjusted "somewhat above". It is unclear what pH values above 4 the claim is intended to encompass.

Claim 15 is drawn to a mixture put in a desired form, "especially as a particle granulate, in tablets..." It is unclear if the claim intends to encompass only the named forms, (i.e. only granules, tablets, etc.) or those forms as well as others.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 18-20 and 22 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the treatment of breast, uterine, esophageal, bladder and lung cancer, does not reasonably provide enablement for the treatment of other cancers. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Claims 18-20 and 22 are drawn to a method of treating a malignant tumor comprising administering the composition of claim 1. The prior art indicates that cancer

is a group of maladies not treatable with one medicament or therapeutic regimen. No single chemotherapeutic drug is useful for the treatment of every tumor. In fact, some types of cancer do not respond well to any known chemotherapeutic drugs (see Oxford Textbook of Oncology, p. 451, Column 2, last paragraph, cited in the Notice of Reference Cited, mailed March 17, 2008). These negative results indicate a lack of predictability in the art. Furthermore the Applicant has provided no working examples demonstrating the efficacy of this treatment on tumors, other than breast, uterine, esophageal, bladder and lung (p. 20-28). For these reasons, it would take undue experimentation by one of ordinary skill in the art to use this method to treat cancers, other than breast, uterine, esophageal, bladder and lung, with a reasonable expectation of success.

***Allowable Subject Matter***

Claims 1-13 and 21 are allowed.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
